- **We also offer** the students to do their project in three different fields Software, Electronics and Embedded. The Project work is an integrated learning experience that encourages students to break away from the compartmentalization of the different disciplines. We aim to provide students with opportunities to explore the inter-relationships and inter-connectedness of subject-specific knowledge in the latest Technologies. Project work in Synergy Technosystems are to allow students to:

  - Apply creative and critical thinking skills.
  - Develop a proto type or working model for the solution of a real-time problem.
  - Improve practical working skills.
  - Foster collaborative learning skills.
  - Develop self-directed inquiry and learning skills.
  - Projects done at Synergy Technosystems have been awarded as "Best Project" at various colleges.
